HYBRID TEA ROSE PLANT NAMED 'FRIVOLOUS PINK'

5 BACKGROUND OF THE INVENTION

The present invention relates to a new and distinct variety of rose plant of the hybrid tea rose which was created by crossing as seed and pollen parents two (2) unknown rose varieties. The varietal denomination of the new variety is  
10 'FRIVOLOUS PINK'.

SUMMARY OF THE INVENTION

Among the novel characteristics possessed by this new variety which distinguishes it from other varieties of which I  
15 am aware, is its pink flowers.

Asexual reproduction by propagation by budding of the new variety as performed in Wasco, California shows that the foregoing and other distinguishing characteristics come true to form and are established and transmitted through succeeding  
20 propagations.
